COVID-19 VACCINE FACTS

01

Side effects from vaccines are a great sign because your body is building up your immune system.

02

Neither the Pfizer/BioNTech COVID-19 vaccine nor the Moderna COVID-19 vaccines contain fetal cells nor were fetal cells used in the development or production of those vaccines.

03

Covid-19 vaccines have NOT been linked to infertility.

04

There is no vaccine microchip, and the vaccine will not track people or gather personal information into a database.
